

## Market Research Reports

### **Bacterial Vaginosis Drugs Market Share, Market Analysis, Industry Size, Strategies and Forecast 2017 - 2025**

The latest market report published by Credence Research, Inc. "Bacterial Vaginosis Drugs Market - Growth, Future Prospects, Competitive Analysis, 2017 - 2025," the global bacterial vaginosis drugs market is set to grow at a CAGR of 2.9 % from 2017 to 2025.

#### Market Insights

The microflora imbalance due to the substitution of hydrogen peroxide producing Lactobacilli sp., with that of harmful bacterial species such as G.vaginalis, Mycoplasma and Ureaplasma causes bacterial vaginosis. It is very important to understand that few women experience the infection for a longer period of time and some for a transient period. The whiff test is used for the diagnosis of bacterial vaginosis which is asymptomatic in most cases. The recent approval of SPL7013 an astrodimer sodium is used for the treatment of recurring bacterial vaginosis due to its antiviral properties. Secnidazole (Solosec) is set to replace metronidazole as a single dose to be taken once in day orally. The granules are sprinkled over yogurt, pudding or apple sauce and consumed within 30 minutes without chewing the granules.

Metronidazole and clindamycin are prescribed by physicians globally as the first line of treatment in bacterial vaginosis. The dominance of antibiotics is backed by a reason that the generic antibiotics available are both oral and topical formulations at affordable prices. Normal pH retention gels will highlight quick acceptance owing to its nontoxicity and immediate symptomatic relief.

Dominance of North America in the bacterial vaginosis drugs market has been related to the rising prevalence of bacterial vaginosis in non-white women due to unsafe sex, and poor lifestyle such as binge drinking and incessant cigarette smoking. The presence of established generic market for antibiotic drugs, and lack of knowledge regarding self hygiene will project an impressive growth for bacterial drugs market in Asia Pacific.

The bacterial vaginosis drugs market includes major players such as Pfizer, Inc., Bayer AG, Mylan N.V., Novartis AG, Abbott Laboratories, Inc., Symbiomix Therapeutics, Sun Pharmaceutical Industries Ltd., Sanofi Aventis, Starpharma Holdings Limited and Perrigo Company Plc.
