New Yorker Electronics Releases New Rugged Panel Mount LED Assemblies

NORTHVALE, NEW JERSEY, USA – New Yorker Electronics has introduced the new 14mm Mount CL Series Panel LED for industrial and outdoor applications. The CL Series incorporates a 10mm LED available in red, green, yellow, blue and bicolor options. Factory prewired with internal resistors, the indicators can be configured for voltages up to 60 VDC or 120/240 VAC.

The robust M14 size metal housing is designed for panel thicknesses up to .394in (10mm) and is resistant to shock and vibration. Fully filled with epoxy and equipped with a watertight front sealing gasket, the indicator offers IP67 front and back sealing for outdoor use.

With available Mil Spec MIL-W22759/33 wire and connector options, applications include military and aerospace, as well as agricultural and construction equipment, forklifts, cranes and transport equipment, remote control systems for forestry or freight handling equipment, industrial machinery and more.

Features & Benefits:

- Rugged watertight construction – sealed to IP67
- Front mounts with supplied hex nut, spacer and gasket
- Optional internal resistor for 5V-60VDC and 5V-240VAC
- Mil Spec MIL-W22759/33 wire and connector options
- Internally potted- suitable for high vibration applications

Applications:

- Military & Aerospace
- Agriculture & Construction
- Transportation
- Forklifts & Cranes
- Remote Control Systems for Forestry
- Freight Handling
- Industrial Machinery

Wilbrecht LEDCO LED Indicators Lights designs are customizable and virtually any combination of colors and LED types can be assembled to specific standards. New Yorker Electronics is a franchise distributor of Wilbrecht LEDCO, a subsidiary of Microprecision Electronics SA, and carries the full line of Wilbrecht LEDCO Industrial Microswitches, Limit Switches, Metal Foil Resistors and LED Indicator Lights.

ABOUT NEW YORKER ELECTRONICS:

New Yorker Electronics is a certified franchised distributor of electronic components, well known for its full product lines, large inventories and competitive pricing since 1948. New Yorker Electronics is an AS9120 and ISO 9001:2015 certified source of capacitors, resistors, semi-conductors, connectors, filters, inductors and more, and operates entirely at heightened military and aerospace performance levels. It also functions in strict accordance with AS5553 and AS6496 standards — verifying that it has implemented industry standards into everyday practices to thwart the proliferation of counterfeit parts. It is a member of ECIA (Electronics Component Industry Association) and of ERAI (Electronic Resellers

Association International).
