

PRO RADIO TOOLS

PRO RADIO TOOLS™ launches PRT Broadcaster, a suite for SHOUTcast and Icecast internet radio streaming.

PRT Broadcaster, a software suite for running an internet radio station from a single computer.

SACRAMENTO, Calif. (Sept 16, 2017) — PRO RADIO TOOLS is pleased to announce the release of PRT Broadcaster, a software suite for running an internet radio station from a single computer.

PRT Broadcaster - Professional Internet broadcast DJ software. The new software suite is a free trial software application currently available in English and can be installed on Windows 7, Windows 8 & Windows 10. PRT Broadcaster is compatible with both Icecast and SHOUTcast streaming technologies.

The software is an affordable broadcast automation solution that has been undergoing continuous development now for over four years, specifically to meet the "specialized" needs of online broadcasters.

The broadcasting suite features Mp3 Streaming, Dj Mixing Console, Sample Pad Controller, Automation Deck with Advanced Rotation Logic, Real Time Stats, DSP Effects, Mic Input, Audio Output and Much More, all wrapped up into a Sleek UI Design.

PRT Broadcaster comes in three versions to accommodate the needs of everyone: Lite (\$19.99), Live (\$49.99) & Studio (\$99.99). It is now available for download as a free trial with no restrictions from the company's website.
