

Wooderra Panama

## **Wooderra launches easy-to-install deck tiles**

### ***An innovative product that makes DIY outdoor project a piece a cake***

Panama City, Panama – Wooderra Panama launched deck Tiles Available in Teak, Amargo Amargo or Almendro earlier this year, attracting the attention of many professional woodworkers and professional homeowners.

The motive behind this innovative product is to introduce to the public a quick smart fix to upgrade old, damaged, discolored wood decks or equally troubled composite decks, or concrete slabs. Wooderra's deck tiles form a semi-permanent valuable wood deck. Advanced construction skills are not required for installing deck tiles making them a great DIY project to start with no fuss and no mess. Few tools are required, installing them doesn't even involve raising a hammer. The only material easier to work with than deck tiles is a rug.

The demand is increasingly rising so Wooderra has decided to expand the distribution of the product to all Americas, Europe, Asia, and Africa.
